YOUR COMPANY  
Paris, Monday, 21 April 2025

Subject: Application for a work-study position as a cybersecurity threat analyst for a three-year assignment.

Mrs, Mr the Chief People Officer,

Former Public Finance Inspector with an analyst qualification, I left the Ministry of Economy and Finance to create a company providing IT training, information and financial consulting.

My motivation is to support companies in their implementation of new technologies. I have a multifaceted approach. Very attracted to change and innovation, my activity consists of monitoring the emergence of new products and new applications, testing tools, advising decision-makers in the selection and implementation, monitoring the implementation and application of new solutions and their use up to the evaluation of the added value for the establishment of a relationship of trust and loyalty.

Motivated by new technologies, I am particularly drawn to new technologies such as big data, generative artificial intelligence, and new security challenges. I am particularly interested in developing my expertise in the field of cybersecurity. With this in mind, I am joining the Ecole 2600, the school of excellence in cybersecurity, and am looking for a dynamic company to complete my apprenticeship in conjunction with this school. I am also open to sales positions.

You are a company and uses IT, a consulting company or a company specializing in the security of data, networks and systems. You are looking for a specialist for your actions to protect your data, prevent cyberattacks, strengthen your technical infrastructure, mobilize your employees or act in the implementation of a business continuity and disaster recovery plan. You are successful in business. I am independent, rigorous, dynamic, conscientious, have good writing skills and a sense of teamwork and want to be the partner to secure your data and infrastructure.

I would like to contribute to your success by offering services related to systems and network administration and cybersecurity, as the implementation of secure applications. In conjunction with the Ecole 2600, I am looking for a company to expand my knowledge, skills, and experience. I am as interested in technology as I am in its environment. As a disabled adult, I am not subject to an age limit for completing this training as part of a work-study program.

I would very much like to meet with you to discuss these topics and my ability to partner with you. Pending an interview, please accept, Mrs, Mr the Chief People Officer, the assurances of my highest consideration.

Yours faithfully,  
Pascal TRABBIA
